200-300 SERIES

The Graftack 200/300 series is a range of flexible polymeric calendered PVC films for long term outdoor applications (up to 7 years) on an even or slightly curved surface.

The Graftack 200/300 series is supplied on a 120 gram silicone release liner. A high-quality solvent based permanent acrylic adhesive guarantees perfect adhesion on all kinds of surfaces. (Either with or without air escape technology)

The Graftack 200/300 series was developed for all outdoor applications up to 7 years, when applied on a flat, unribbed background, such as sign making on cars, boats and trucks, for long term decorations on shop windows and advertisement boards. It is also perfect for everyday advertising indoors and outdoors.

A wide range of sparkling colours guarantees a magnificent end result time and time again.
