GrafiGuard Paint Protection Films

Grafityp's GrafiGuard extremely strong paint protection films offer additional and unnoticable protection against stone chips and scratches when applied to the most vulnerable parts of your vehicle by forming an invisible shield.

Paint Protection (PVC)

Grafityp's transparent paint protection calandered (PVC) . These offer excellent protection on flat and slightly curved surfaces. Can be applied dry or wet. Wet application is only recommended on flat or slightly contoured surfaces.

Note: these are less conformable than the TPU films and not suited for a full wrap

Paint Protection (TPU)

Grafityp's crystal clear extremely strong paint protection thermoplastic polyurethane (TPU) films offer additional protection and are distinctively clearer with a high gloss finish. These are wear and impact resistant, conformable and as a result it is no problem to use these for full wraps. TPU films are applied on soaking wet car surfaces.

Jaguar Series

QUICK QUOTE

High Speed, Precision Cutting

Jaguar V incorporates a high-speed digital servo drive system that provides accurate, smooth and fast operation. The maximum cutting speed is 60 inch/sec (1530 mm/sec).

600 Grams Cutting Force

Selectable cutting forces, ranging from 5g to 600g, accommodates a wide variety of materials, including fine and thin masking films to thick and hard reflective films.

AAS II- Segmental Positioning

Images can shift during the printing process which causes crooked prints. Jaguar V LX series features segmental positioning which can scan the registration marks one by one automatically to calibrate for the shift.
