Welcome to our Textile Transfer catalogue

Grafityp UK Ltd has supplied the cad cut and print markets since 1991. We pride ourselves on the quality of products and service we supply and are constantly striving to improve all areas of our business. We are accredited to ISO 9001:2000 and regular re-assessment ensures we maintain our high standards.

Part of the International Grafityp Self-Adhesive Products Group, Grafityp UK Ltd holds over two million pounds worth of stock products for the Textile, Signmaking, Digital Printing and Laser Engraving industries.

Based in Tamworth, Staffordshire the Grafityp central distribution point is strategically situated within easy reach of local motorway networks. This ensures next day delivery to the majority of our customer base. We also have showrooms where you can view our extensive product range.

Call us now to find out why every year more and more valued customers are turning to Grafityp for their equipment and material requirements.

Grafityp UK Ltd have been partners with SISER for over 25 Years

Siser has 40 years of history in manufacturing heat applied films. These are manufactured to the highest quality standards, making them one of the leading manufacturers of thermo transfer materials in the world.

REMEMBER

It's quick and convenient to order online at

www.grafityp.co.uk

HTV Craft Supplies is Grafityp UK's online shop for small quantity purchases aimed at the smaller user and craft market.

Digital Print Transfer Films

Grafityp offers an extensive range of media for producing full colour textile transfers. There are products for all types of applications. The films are available in both matt, satin and special effect finishes.

There are films with stretch properties which are excellent for sportswear, dancewear plus many more. Soft print is an extremely thin clear film only 45 microns thick for use on white and pastel garments.

Please note this range of materials are now sold in 5m increments

C-Print PU+

Incredible stretch and rebound properties

- Thin PVC free white film
- Suitable for light and dark garments
- Available in both satin and matt finish
- Instant drying for rapid application

Printing

Suitable for solvent, eco solvent, HP latex printers

Also compatible with Roland TrueVIS inks

Ideal for

Cotton, Polyester, Poly/Cotton and Lycra

GCC Jaguar V and Jaguar V LX

Create stunning designs for fashion wear, sportswear, workwear, promotional clothing, caps, footwear, bags, umbrellas and much more!

High Speed, Precision Cutting

Jaguar V incorporates a high-speed digital servo drive system that provides accurate, smooth and fast operation. The maximum cutting speed is 60 inch/sec (1530 mm/sec)

600 Grams Cutting Force

Selectable cutting forces, ranging from 5g to 600g, accommodates a wide variety of materials, including fine and thin masking films to thick and hard reflective films

AAS II- Segmental Positioning

Images can shift during the printing process which causes crooked prints. Jaguar V LX series features segmental positioning which can scan the registration marks one by one automatically to calibrate for the shift

Jaguar V

- FREE GreatCut software
- Ethernet port
- 2 Year on site warranty
- Available in 610mm and 1320 mm widths

Jaguar V LX

- FREE GreatCut software
- Section cutting
- Segmental positioning
- Multiple copies
- Accu-Aligning System (AAS II)
