

Product Information

Paris 50% Poly/Cotton Eco Canvas

Description

Poly/cotton canvas material with white satin coating on one side. High stability against environmental influences, fast drying, satin-matt colour reproduction with no reflections on the printed surface. Natural coloured textile backing. Suitable for stretching on stretched bars (no cracking on edges). For medium-term use depending on the ink type. For printing on printers utilising eco solvent inks, solvent inks, latex inks and UV curable inks.

Composition

Material:	Poly cotton canvas (50% cotton, 50% polyester)
Thickness:	390 um
Weight:	300g/m ²
Dimensions:	762mm, 1370mm
Roll Length:	25m

Applications

Indoor signs, framed art, outdoor signage, art prints (clichés), poster, exhibition works, stage decoration etc.

Laminating

We recommend protecting the printed surface when it is subjected to abrasion, moisture or other mechanical influences. In this case, we recommend protecting the image with an appropriate liquid lamination.

Storage

After printing we recommend removing the remaining roll from the printer and to keep the canvas in the original packaging in a cool and dry environment.

Notes

Due to the natural components of the cotton in the raw textile, the surface finish of the media can slightly vary. Also, slight colour deviations can occur from production to production.
