An ecological alternative

Do you want to propose an ecological alternative to PVC films to your customers? Graftyp Ecological Films (GEF) are suited for the same applications, indoors as well as outdoors, but don't hold any chlorine or plasticizers.

Graftyp Ecological Films (GEF) look the same, feel the same and can be applied in the same way as PVC films, yet their composition is completely different. And of course, an ecological film comes with a dispersion based adhesive.

100% green,
100% quality!

We make self adhesive products that stick,
and will make you stick. We are Graftyp.

GRAFTYP

makes you stick

We offer a PVC free film for every application. Signmaking films, print media and laminates.

SIGNMAKING

In matt and glossy, for all indoor and outdoor advertising on even surfaces, with a life span up to 5 years.

DIGITAL PRINTING

Polyolefine films for indoor and short-term applications. For solvent or UV printers. Thermoplastic polyurethane films for comfort car wrapping.

LAMINATING

Matt, glossy and satin polyolefine laminates for protecting prints on monomeric, polymeric or PVC-free print media. Thermoplastic polyurethane laminate for protecting prints made on the PU print films.
