# Take Control by Insourcing.

To succeed in today's competitive business environment, you need to produce quality promotional materials while saving as much time and money as possible. Like many companies, you may be outsourcing your graphics with mixed results. If this is the case, then it's time for a change.

Start "insourcing" with a Roland VersaCAMM Series printer/cutter, the right choice for your business.

With a VersaCAMM, you will enjoy uncompromising 4-color print quality, high speed performance, and automatic printing and contour cutting all in one device. Best of all, you'll be fully equipped to produce the quality labels, posters and other promotional materials your business demands.

It's time to take control with the VersaCAMM.

### Save Time and Money

## Bring your Promotional Activities to Life

The VersaCAMM Series is highly versatile for an endless range of applications. With just one device, you can produce decals, labels, stickers, posters, POP, vehicle wraps, heat transfers for apparel decoration and other promotional items of any size, on demand for both indoor and durable outdoor display. Use a wide variety of media, including adhesive-back vinyl, banner, paper, film, tarpaulin and heat transfer paper. Now there are two VersaCAMM lines available: the VP-i series for higher productivity and SP-i, our lower-priced entry-level models. Choose one that best fits your business demands.

## Achieve Professional Quality Results without Any Special Skills

With the VersaCAMM, you can achieve professional quality results even without any previous experience. Roland Intelligent Pass Control® technology automatically delivers the smooth gradations and flawless solid colors you require. It also increases your productivity. The VersaCAMM VP-i series is a full 80 percent faster than the previous model in standard mode.\*1 New environmentally-friendly FPG2 aqueous ink is also available for the VP-540i/300i.\*2 ECO-SOL MAX ink produces vivid colors for durable graphics. FPG2 inks are ideal color reproduction such as photorealistic graphics.

\*¹ Increased to 9.4 m²/hr (101.2 sqft/hr) on banner and 8 m²/h (86.1 sqft/hr) on vinyl in standard print mode, compared to 5.2 m²/hr (55.98 sqft/hr) on banner and vinyl without Roland Intelligent Pass Control \*² Ink type (either FPG2 or ECO-SOL MAX) must be selected at the time of purchase.

### Improve Communication

We can reproduce spot colors with total accuracy using the Roland Color System Library. We used to spend a lot of time adjusting color with our printer, but not anymore.

## Enjoy the Versatility of Printing and Digital Die-Cutting — All in One Device

With VersaCAMM, it's easy to create graphics in unique, custom shapes that add value and attract attention. Using Adobe Illustrator, you can easily draw contour cut lines in virtually any shape around your graphics. VersaCAMM will automatically print and cut your designs. Roland DG pioneered Print&Cut technology and today more than 73,000 Roland printer/cutters have been sold worldwide\* making Roland the number one brand of Print&Cut inkjet devices.

\*The number of installed units as of February 27, 2009.

### Intuitive Roland Operation Software Included

Every VersaCAMM comes with VersaWorks, our own RIP software for professional print quality. VersaWorks features the Roland Color System to accurately reproduce the spot colors you select from Roland Color charts and swatch books. Variable Data Printing makes it easy to create a series of individualized prints based on one template, with each print featuring its own photos, messages, numbers and names. In addition, VersaWorks estimates the ink usage and print time for each graphic so you can accurately monitor your time and costs. You can also update your software automatically through the Internet.

### Produce Better, More Creative Ideas

#### Easy to Use and Designed with Your Office in Mind

VersaCAMM is as easy to operate as any other equipment in your office. Its compact footprint is designed to fit comfortably into your office environment. Both ECO-SOL MAX and FPG2 inks come in easy-handling sealed

cartridges and are virtually odor free. You also get legendary Roland reliability and world-class service and support, including training through Roland workshops and seminars.

#### Our Most Advanced VersaCAMM Line to Date Featuring Both **VP-540i/300i** High Speed and Quality Performance

VP-540i 54"(1371mm) wide 4-Color (CMYK) ECO-SOL MAX/FPG2 Inkjet Printer/cutter

#### Features

- CMYK four colors with 4 printheads
- Choose from two types of inks: ECO-SOL MAX, mild solvent ink and FPG2 aqueous inks
- High productivity and professional quality results
- Print, Cut, and Print & Digitally die-cut three ways in one device
- VP-540i offers two selectable printhead heights to match the thickness of your media
- Handles media rolls up to 30kg (66 lbs.) for VP-540i and 20kg (44 lbs.) for VP-300i
- Powerful Roland VersaWorks RIP software included
- Roland Eco Label and Energy Star Program certified
- Roland reliability and world-class service and support

### SP-540i/300i Featuring a Lower mance Featuring a Lower Initial Investment While Maintaining

54" SP-540i 54"(1371mm) wide 4-Color (CMYK) ECO-SOL MAX Inkjet Printer/cutter

#### **Features**

- CMYK four colors with 2 printheads
- Designed exclusively for Roland ECO-SOL MAX mild solvent ink
- Lower initial investment while providing reliable production with professional quality - most suitable for production 50m<sup>2</sup> or less per day
- 1.5 times faster than the previous SP model in standard print mode
- Print & digitally die-cut on one device
- Handles media rolls up to 30kg (66 lbs.) for SP-540i and 20kg (44 lbs.) for SP-300i
- Powerful yet easy-to-use Roland VersaWorks RIP software included
- Roland Eco Label and Energy Star Program certified
- Roland reliability and world-class service and support

\*1 The length of printing or cutting is subject to the limitations of the program. \*2 Using Roland specified media, print travel of 1 m, temperature: 25°C (77°F), humidity: 50%RH \*3 Not assured when the print heater or dryer is used.
\*4 Using Roland specified media, loaded on the shaft, [PREFEED] menu item must be set to "ENABLE," with 25 mm or more for both right and left margins and 35 mm or more front margin, excluding expansion or contraction of the media.
VP-540i: Media 610 mm wide or over and 4,000 mm long. Media 610 mm wide or less and 8,000 mm long. VP-300i: media 3,000 mm long.
\*5 Provided that media length is under 3,000 mm. Temperature: 25°C (77°F) Excluding possible shift caused by expansion/contraction of the media and/or by reloading the media.
\*6 Using Roland specified media, data size: 1,000 mm in the media-feed direction, 1,346 mm (VP-540i) and SP-300i and SP-300i in the carriage-movement direction. No lamination. Automatic detection of crop marks at 4 points when media is reloaded. During cutting, [PREFEED] menu item must be set to "ENABLE." Temperature: 25°C (77°F). Excludes the influence of misalignment, expansion or contraction of the media.

\*7 Warm-up is required after powerup. This may require 5 to 20 minutes, depending on the operating environment. The preset temperature may fail to be reached depending on the ambient temperature and media width.

#### Roland VersaWorks System Requirements

Operating system	Windows Vista® Ultimate Service Pack 1 or Business Service Pack 1 (32-bit edition), Windows Vista® Ultimate or Business (32-bit edition), or Windows® XP Professional Service Pack 2 or 3, or Windows® 2000 Service Pack 4			
CPU	2.0 GHz or faster Pentium 4 recommended (2 GB or more recommended for Windows Vista®)			
RAM	1 GB or more recommended (Windows Vista® : 2 GB or more recommended)			
Video card and monit	or A resolution of 1,280 x 1,024 or more recommended			
Free hard-disk space	40 GB or more recommended			
Optical drive	DVD-ROM drive			

#### Automated take-up system

For unattended printing, an optional take-up system supports media rolls for VP-540i, VP-300i, SP-540i and SP-300i.
