

Product Information

TEXT PRINT

Description

PU heat seal material with a non-adhesive polyester backing, created for inkjet digital printing & cutting systems with solvent and eco-solvent based inks.

Average Thickness: 90 microns

Compatible with Roland TrueVIS and HP Latex inks.

Suitable for cotton, polyester, performance wear, poly/cotton blends and spandex, not treated or dye sublimated.

Cutting & Pressing

Vinyl Cutter/Plotter Settings:

Blade: new at 45°

Minimum required pressure: 50gf

1. Print & cut the material
2. Weed the exceeding material
3. Remove the print from the polyester backing using Siser's T.T.D. Easy or Hotmask (adhesive, transparent and resistant to high temperatures)
4. Heat apply
5. Remove the application tape warm (should you use other application tapes, follow the manufacturers instructions)

Please allow the print to dry for at least 2 hours.

Due to the many different base materials available on the market, these heat transfer instructions are given as a guideline only.

Washing and care guidelines

Wait 24 hours after heat transfer before washing inside out. Do not use bleach or other aggressive chemical agents. Do not dry clean.
