

S-Print · FAQ

The first-ever full water-based Heat Transfer Vinyl on the market

Q What does full water-based mean?

A Full water-based means that the material (S-Print) has been produced with chemical substances worked in water instead of solvent. Water is green, solvent is not.

The water-based production process has a lower impact on energy consumption, making it more sustainable and environmentally friendly.

Q Full water-based is related to inks or material?

A Full water-based is related to the material production process. You can print with your usual inks.

Q Full water-based Heat Transfer Vinyl: Can we rely on them?

A Absolutely yes! The performance, the workability, the printing yield of full water-based materials are the same as solvent-based materials.

Q Why choose S-Print? Here are 3 quick reasons:

- A**
1. It's the first-ever full water-based Heat Transfer Vinyl on the market.
 2. Excellent workability: even if the material is elastic, S-Print is easy to cut, weed and apply. The TTD unmasking process has never been so smooth!
 3. Low temperature, low time application.

Q How does S-Print feel?

A S-Print feels soft and smooth to the touch and does not feel rubbery or stiff. Here's why S-Print is perfect for big designs.

Q Is Siser TTD Mask reusable?

A Siser TTD Mask is reusable! Stick it back to the carrier sheet and reuse it until it stops being sticky.

Q What is the recommended washing temperature for S-Print?

A S-Print can be washed up to 40°C. Higher temperatures can weaken the adhesive or cause abrasion of the heat transfer vinyl.

Q Is S-Print suitable for the dryer?

A Yes. Dry on a delicate setting.

Q What is the shelf life of S-Print?

A S-Print lasts up to 2 years. The optimal condition for storage is out of the direct sunlight in a cool, dry area with temperatures between 18°C and 26°C.

Q Is it Oeko-Tex Standard 100 certified?

A S-print is Oeko-Tex Standard 100 Class I certified. Oeko-Tex Standard 100 is a product label for textile products that have been tested from all processing stages to be free from harmful chemicals and safe for babies and toddlers.

Q Is it VEGANOK certified?

A S-print is VEGANOK Class I certified. VEGANOK is a label that defines vegan products, i.e. products that do not use animal-derived materials in manufacture and do not contain animal-derived materials in the finished.
