Disco

Description

Heat transfer material with a shiny, iridescent and prism-like finish with a rainbow effect.

This unique vinyl combines fashionable holographic and metallic looks with an iridescent chameleon-like finish. The surface is glossy and smooth, giving it an incredibly polished look.

Average film thickness before transfer: 165 micron

Usage Information

Due to the many different base materials available on the market, the following instructions are given as a guideline only :

Application Instructions

Transfer setup
Temperature: **150 °C**
Time: **10 seconds**
Pressure: **medium (4-6 bar)**

Procedure
